26: Projected incident movement/spread 12, 24, 48, and 72 hour time frames:

12 hours:

24 hours: Potential for movement to the north or northwest with prevailing southwest winds.

48 hours:

72 hours:

- 27: Values at Risk: include communities, critical infrastructure, natural and cultural resources in 12, 24, 48 and 72 hour time frames:
- 12 hours:

24 hours: 306 homes, wildilfe resources commission property, and Bushy Lake State Natural Area property will be at risk if fire escapes current containment lines

48 hours:

72 hours:

- 28: Critical Resource Needs (amount, type, kind and number of operational periods () in priority order in 12, 24, 48, and 72 hour time frames):
- 12 hours:
- 24 hours:

48 hours: 2 Type 2 tractor plow strike teams for replacement. 3 Engine Strike Teams for replacement.

72 hours:

29: Major problems and concerns (control problems, social/political/economic concerns or impacts, etc.) Relate critical resources needs identified above to the Incident Action Plan.

Continued drying of organic soil, fuels are in the 90th percentile, gusty and erratic winds are possible with thunderstorm activity. Poor trafficability for access to many sections of the fire due to deep sand and organic soil that becomes very slick with minimal rainfall.

30: Observed Weather for Current Operational Period Peak Gusts (mph): 5 Max.

31: Fuels/Materials Involved: **4 Chaparral (6 Feet)** 

Temperature: 98
Wind Direction: SW
Min.

Bay fuels (Sweet Bay, Wax Myrtle, Loblolly Bay) and Sandridge.

Relative Humidity: **42** 

32: Today's observed fire behavior (leave blank for non-fire events):

Moderate fire activity observed along the fire perimeter with smoldering, creeping, and isolated torching associated with re-burn of cured fuels.

33: Significant events today (closures, evacuations, significant progress made, etc.):

The Brandon Type 2 IMT assumed command of the fire at 0700 hours today.

34: Forecasted Weather	for next Operational			
Period		35: Estimated	26. D 1 F 1	27. E.C 1 E' 1
Wind Speed (mph): 4	Temperature: <b>98</b>	Control	3	
Wind Direction: <b>SW</b>	Relative Humidity:	Date and Time:	Size:	Cost:
43				

38: Actions planned for next operational period:

Continue holding control lines using engines and tractor plow units. Continue mop-up of hot spots along fire perimeter to maintain containment. Continue rehabilitation efforts as possible.

- 39: For fire incidents, describe resistance to control in terms of:
- 1. Growth Potential High
- 2. Difficulty of Terrain High

40: Given the current constraints, when will the chosen management strategy succeed?

## Unknown

- 41: Projected demobilization start date:
- 42: Remarks:
